PROFESSIONAL SUMMARY

Computer Engineer with practical experience in developing web applications using Python and Django. Interested in backend development, building reliable systems, and learning through real-world projects. Looking to join a team where I can grow as a programmer and contribute to meaningful work.

PROJECTS

Ecommerce website for diary and other products (Python, Django)

- Developed a scalable e-commerce web application using Python and Django, featuring user authentication, dynamic product listings, shopping cart, and secure checkout.
- Implemented backend logic for order processing, session management, and admin controls using Django views, models, and ORM.

Food compare (Python, Playwright)

- Developed a robust Swiggy web scraper using Playwright and Python to automate restaurant data extraction with dynamic element handling, randomized human-like delays, and structured result parsing.
- Implemented scalable, headless browsing workflows for high-performance data collection and integration into backend analytics pipelines.

Face Recognition (Python, ML)

- Built a real-time Face Recognition Attendance System using Python, OpenCV, and face recognition with multi-image encoding, tolerance-based matching, and frame-skip optimization for webcam processing.
- Implemented robust image validation, CSV-based attendance logging with timestamps, and interactive controls for production deployment.

EDUCATION

2025- Present

TOPS TECHNOLOGY

- Data Science
- AI-ML

2021-2025

INDUS UNIVERSITY

- Computer Engineering
- CGPA: 8.72 / 10

SKILLS

- Python (Numpy, Pandas, Keras, Tensorflow, Beautiful Soup, Playwright, Selenium)
- Django & Flask
- SQL, SQLite, NoSQL
- HTML & CSS
- Json

CERTIFICATES

- Data science and machine learning (udemy)
- Data Science (Unified mentor)
- Python (Udemy)
- Cyber Security (Indus University)

LANGUAGES

- English
- Hindi
- Gujarati
